

Velvet Blue Blend

granite
SEED
and erosion control

Specifications:

100% Kentucky Bluegrass

Seeding Rate:

3-5 lbs. / 1,000ft² (new lawn)

1.5-2 lbs. / 1,000ft² (overseeding)

When uniformity in color, growth, and texture takes priority in your lawn grass, our **Velvet Blue Turf Mix** is the solution. It contains 100% pure Kentucky bluegrass with no other species included. Although very similar to our famous 'Blue Ribbon' mix, our Velvet Blue lacks the addition of perennial ryegrass. The benefits of removing the perennial ryegrass include a more uniform and consistent color and growth rate. It also ensures the same soft texture and feel throughout the entire lawn. It's important to note that by removing the ryegrass the establishment rate is slowed considerably. Our Velvet Blue Turf Mix is TWCA qualified and uses up to 40% less water than conventional turfgrasses, so your lawn will look great without using all that water.

Pro Tip: Keep the soil damp, but not soggy, for the first 30 days after planting. Consider setting your irrigation system to water for periods of 3 to 5 minutes, several times per day until your new lawn is at least 4 inches tall. After the second mowing you can start cutting back the watering cycles to 15 minutes 2-3 times per week as needed.
